4.1 Impact of long exposure to mobile screen	29
4.2 Activity	33
Chapter 5: Mouse Magic: Moving and Clicking Fun	34
5.1 What is Mouse	34
5.2 Holding the Mouse	36
5.3 Activity-4	37
5.4 Activity-5	39
Chapter 6: Being a Computer Room Super Star	40
6.1 Activity	40
Chapter 7: Color me	42
NOTES	46

Chapter 1: Friendly Computer Helper your Digital Friend at Work and Play

1.1 What is a Computer ?

A computer is a smart electronic machine that we can talk to and use. It helps us do many things like play games, learn, and talk to friends far away. Computers are different from other machines because they understand what we want them to do.

1.2 What does a Computer do ?

Computers help us learn. Computers make our work easier.

They let us watch movies and listen to music.

Computers help us talk to friends and family who are far away.

We can read stories, play math games, and find fun facts.

We can use them to draw pictures and make fun art.

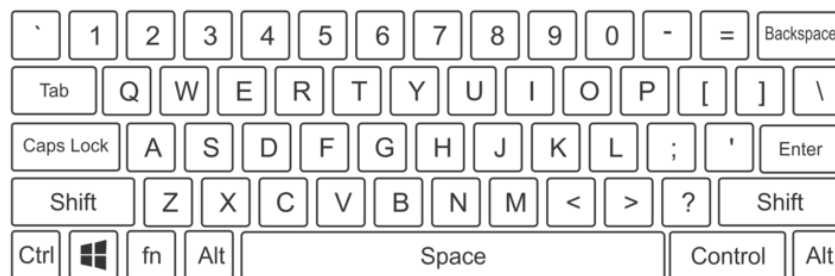

1.3 Parts of Computer:

1.3.1 Monitor:

The computer screen is like a magic window. It shows you everything the computer is doing. You can see pictures, games, and words on it. The screen helps you tell the computer what to do next.

1.3.2 Keyboard:

A keyboard is a special board with buttons. Each button has a letter or number on it. When you push the buttons, the computer sees what you want to say. It's like magic writing that goes right into the computer!

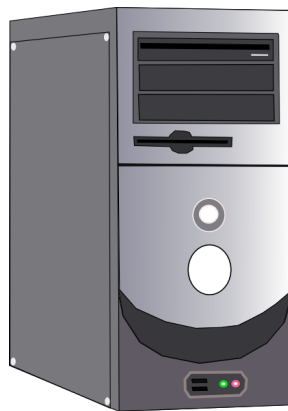

1.3.3 Mouse:

A mouse is a little tool that helps you tell the computer what to do. You move it on the table, and a tiny arrow moves on the screen. When you click the mouse, it's like pointing your finger at something you want. It helps you pick things on the screen and move them around.

1.3.4 CPU:

The CPU (Central Processing Unit) is like the computer's brain. It's a special part inside the computer that thinks really fast. It helps the computer do all its jobs. When you play a game or draw a picture, the CPU is working hard to make it happen.

Fun Check-in:

1. Play "Computer Parts Charades": Act out each computer part (screen, keyboard, mouse, CPU) and have kids guess.
2. Story Time: Tell a short story about using a computer, pausing to ask what part or action comes next.
3. What Does a Computer Do?" Game: Call out an activity (like "draw a picture" or "watch a video") and have kids shout "Computer!" if it's something a computer can help with.
