Chapter 1: Time-Travelling Gadgets: The Awesome Journey of Technology

1.1 What is Technology?

The term technology comes from the Greek word techne, meaning art and craft, and the word logos, meaning logic and reason. It is now used to describe advancements, innovations and changes which affect the environment around us

Kinds of Technology

1. Non-Physical (Intangible)- Anything that you cannot touch and feel is called non-physical technology.
2. Physical (Tangible)- Anything that you can touch and feel is called physical technology.

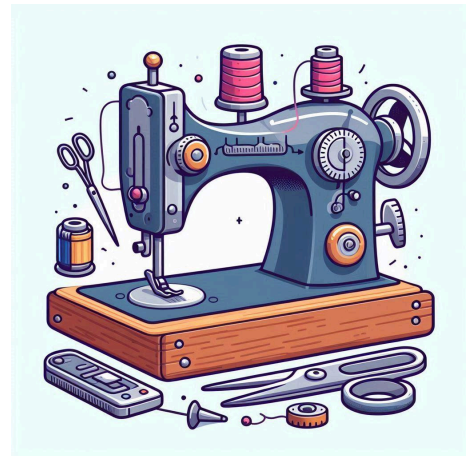

1.2 Types of Physical Technology

1. Mechanical technology
2. Electronic Technology
3. Communication Technology
4. Industrial Technology
5. Medical Technology
6. Energy Technology
7. Construction Technology

1.2.1 Mechanical Technology

Combination of different mechanical parts to produce, control, transmit motion.

1.2.2 Electrical Technology

Electrical technology is a technology of producing, storing, controlling, transmitting and getting work from electrical energy.

1.2.3 Communication/Information Technology

Communication technology refers to all equipment and programs that are used to process and communicate information.

1.2.4 Industrial Technology

Industrial Technology is the use of engineering and manufacturing technology to make production faster, simpler and more efficient for mass production

1.2.5 Medical Technology

Healthcare technology refers to any tools or software designed to boost innovation and discovery in healthcare and biotechnology.

1.2.6 Energy Technology

Energy technology is concerned with developing systems capable of producing, transporting and delivering energy in a way that is safe, economical and environmentally-friendly.

1.2.7 Construction Technology

The collection of innovative tools, machinery, modifications, software, etc. used during the construction phase of a project that enables advancement in field construction methods.

1.3 Types of Non-Physical technology

1. Internet
2. Data
3. Language
4. Music
5. Bitcoin/Cashless payment

1. Internet

2. Language

3. Data

5. Music

1.4 Activity

List 5 technologies you will find at Home, School and Locality.

1.5 Assessment

Read the Following MCQs and Tick the Correct Answer

1. What is the origin of the word "technology"?
 - ☐ Latin for "tool"
 - ☐ Greek for "art and craft" and "logic"
 - ☐ French for "innovation"
 - ☐ English for "science"

2. What type of technology is intangible and cannot be touched?
 - ☐ Physical Technology
 - ☐ Non-Physical Technology
 - ☐ Mechanical Technology
 - ☐ Medical Technology

3. Which of the following is NOT a type of physical technology?
 - ☐ Mechanical Technology
 - ☐ Communication Technology
 - ☐ Internet Technology
 - ☐ Energy Technology

4. What does Mechanical Technology involve?
 - ☐ Creating electrical systems
 - ☐ Producing motion using mechanical parts
 - ☐ Communicating information
 - ☐ Mass production in factories

5. What is the primary focus of Electrical Technology?
 - ☐ Producing energy
 - ☐ Storing and transmitting electrical energy
 - ☐ Building construction
 - ☐ Developing software

6. What does Communication Technology encompass?
 - ☐ Only hardware devices
 - ☐ All equipment and programs for processing and communicating information
 - ☐ Only software applications
 - ☐ Just the internet

7. What is the goal of Industrial Technology?

- ☐ To slow down production processes
- ☐ To make production faster and more efficient
- ☐ To create artistic tools
- ☐ To manage healthcare systems

8. What does Medical Technology focus on?

- ☐ Engineering and manufacturing
- ☐ Tools and software for healthcare innovation
- ☐ Energy production
- ☐ Construction methods

9. What is the primary concern of Energy Technology?

- ☐ Creating machines for construction
- ☐ Developing safe and economical energy systems
- ☐ Producing medical equipment
- ☐ Manufacturing consumer goods

10. Which of the following is an example of Non-Physical Technology?

- ☐ Construction Tools
- ☐ Data
- ☐ Medical Devices
- ☐ Mechanical Parts
