|-----------------------------------------------------------------------------------|-----------|
| <b>Chapter 1: The Amazing Digital Revolution and Technology in Our World.....</b> | <b>1</b>  |
| 1.1 What are in Industrial Revolution .....                                       | 1         |
| 1.2 The Third Industrial Revolution (Digital Revolution) .....                    | 1         |
| 1.3 Cool Digital Things in India .....                                            | 2         |
| 1.4 Fourth Industrial Revolution. ....                                            | 3         |
| 1.5 Categories of Technology .....                                                | 4         |
| 1.6 Components of Technology. ....                                                | 5         |
| 1.7 Characteristics of Technology .....                                           | 6         |
| 1.8 Assessment. ....                                                              | 7         |
| <b>Chapter 2: Exploring the Digital World .....</b>                               | <b>9</b>  |
| 2.1 What is Computer Network .....                                                | 9         |
| 2.2 What is Internet .....                                                        | 9         |
| 2.3 Web Browsers: Your Windows to the Internet .....                              | 10        |
| 2.4 Search Engines: Your Internet Detective .....                                 | 11        |
| 2.5 The Big Difference .....                                                      | 12        |
| 2.6 How they Work Together .....                                                  | 12        |
| 2.7 URL: The Address of Websites .....                                            | 12        |
| 2.8 Staying Safe on the Network .....                                             | 13        |
| 2.9 Assessment .....                                                              | 14        |
| <b>Chapter 3: Paper Circuit Lighting up Your Creativity .....</b>                 | <b>16</b> |
| 3.1 What You'll Need .....                                                        | 16        |
| 3.2 What is Circuit .....                                                         | 16        |
| 3.3 How it Works .....                                                            | 16        |
| 3.4 Safety First .....                                                            | 16        |
| 3.5 Task 1: Make a Simple Circuit .....                                           | 17        |
| 3.6 Task 2: Parallel Circuit .....                                                | 18        |
| 3.7 Task 3: Series Circuit .....                                                  | 19        |
| 3.8 Exploring Series Circuit Further .....                                        | 20        |
| 3.9 Task 4: Combining Series and Parallel Circuit .....                           | 20        |
| 3.10 Activity 1 .....                                                             | 22        |
| 3.11 Activity 2. ....                                                             | 23        |
| 3.12 Activity 3 .....                                                             | 24        |
| 3.13 Assessment .....                                                             | 25        |

---

|                                                                                    |           |
|------------------------------------------------------------------------------------|-----------|
| <b>Chapter 4: Mastering Gmail: Practice Makes Perfect</b> .....                    | <b>27</b> |
| 4.1 Gmail logo .....                                                               | 27        |
| 4.2 What is Email. ....                                                            | 27        |
| 4.3 Gmail Account .....                                                            | 27        |
| 4.4 How to create Gmail Account .....                                              | 28        |
| 4.5 Task .....                                                                     | 34        |
| 4.6 How to write an email on G-mail .....                                          | 34        |
| 4.7 Task. ....                                                                     | 41        |
| 4.8 How to remove formatting .....                                                 | 41        |
| 4.9 File Attachment .....                                                          | 42        |
| 4.10 Insert link .....                                                             | 43        |
| 4.11 Task .....                                                                    | 45        |
| 4.12 Task .....                                                                    | 45        |
| 4.13 Interface of G-mail .....                                                     | 46        |
| 4.14 Task .....                                                                    | 58        |
| 4.15 Assessment .....                                                              | 59        |
| <b>Chapter 5: Exploring Google Drive: Your Digital Storage Space</b> .....         | <b>61</b> |
| 5.1 What is Drive .....                                                            | 61        |
| 5.2 Why are we using Drive .....                                                   | 61        |
| 5.3 Logo of Google Drive .....                                                     | 61        |
| 5.4 How to open an Google Drive. ....                                              | 62        |
| 5.5 Interface of Google Drive .....                                                | 62        |
| 5.6 Task .....                                                                     | 64        |
| 5.7 Task .....                                                                     | 69        |
| 5.8 Task .....                                                                     | 74        |
| 5.9 Assessment. ....                                                               | 76        |
| <b>Chapter 6: Getting Started with Google Docs: Your Online Writing Tool</b> ..... | <b>78</b> |
| 6.1 What are Google Doc. ....                                                      | 78        |
| 6.2 Google Docs Vs Ms word .....                                                   | 78        |
| 6.3 Google Docs logo .....                                                         | 79        |
| 6.4 How to open Google Doc .....                                                   | 80        |
| 6.5 Interface of Google Doc. ....                                                  | 81        |
| 6.6 Task. ....                                                                     | 83        |
| 6.7 Task .....                                                                     | 84        |
| 6.8 How to write a formal letter in Google Doc .....                               | 84        |

| 7.9 Assessment .....                                                                  | 105        |
| <b>Chapter 8: The Digital Dustbin Understanding E.waste in India: .....</b>           | <b>107</b> |
| 8.1 What is E.waste .....                                                             | 107        |
| 8.2 Where do we Find E.waste.....                                                     | 107        |
| 8.3 Why Should We care About E.waste .....                                            | 108        |
| 8.4 How Can we Help .....                                                             | 109        |
| 8.5 What to do with Old Electronics .....                                             | 109        |
| 8.6 How India is Handling E.Waste .....                                               | 110        |
| 8.7 Your Turn to Help .....                                                           | 111        |
| 8.8 Assessment.....                                                                   | 111        |
| NOTES .....                                                                           |            |

# Chapter 1: The Amazing Digital Revolution and Technology in Our World

Hello, young friends! We're going on an exciting journey to learn about big changes in our world and the cool technology that surrounds us. Are you ready? Let's go!

## 1.1 What are Industrial Revolutions ?

Imagine if the world suddenly changed overnight - that's kind of what an Industrial Revolution is like! It's when new ideas and inventions change how we live and work. We've had several of these big changes, and right now, we're living through some really exciting ones!

**Fun Fact:** India has been part of all these revolutions. During the First Industrial Revolution, we had big textile factories in cities like Mumbai (then called Bombay)!

## 1.2 The Third Industrial Revolution (Digital Revolution)

The Third Industrial Revolution is also called the Digital Revolution. It's when computers and digital technology became a big part of our lives.

- When it happened: Started in the 1960s and really took off in the 1980s
- What changed: We started using computers and digital technology in our daily lives

They made it easier to share information, create new things, and solve big problems. This big change in how we use technology is called the digital

How Did It Change Things?

1. Computers Everywhere:
  - a. Before: Computers were rare and very big.
  - b. Now: We have computers at home, in school, and even in our pockets (like

---

smartphones)!

2. Information at Our Fingertips:
  - a. Before: We had to go to libraries to find information.
  - b. Now: We can find almost anything on the internet in seconds!
3. Fast Communication:
  - a. Before: We had to wait days for letters to reach our friends.
  - b. Now: We can send messages instantly to anyone, anywhere!
4. New Ways to Learn:
  - a. Before: We only learned from books and teachers in classrooms.
  - b. Now: We can learn from educational apps, videos, and online classes too!
5. Fun and Games:
  - a. Before: We played mostly outdoor games.
  - b. Now: We have video games, digital art, and fun apps to enjoy!

**Fun Fact:** The first computer in India was installed in 1955 at the Indian Statistical Institute in Kolkata. It was called HEC-2M and was as big as a room!

How it changed India:

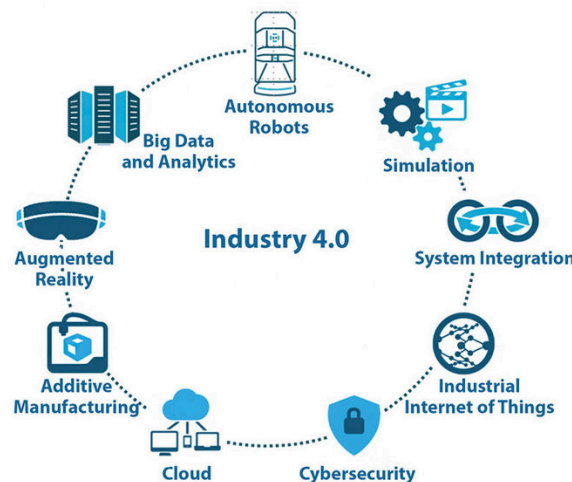

- IT industry boom: Cities like Bangalore became tech hubs
- Mobile revolution: Almost everyone in India now has a mobile phone
- Digital services: Things like online banking and e-governance started

## 1.3 Cool Digital Things in India

1. Digital India: Our government's plan to make India more digital and connect everyone with technology.
2. **Fun Fact:** As part of Digital India, the government aims to provide high-speed internet to all 250,000 gram panchayats in the country!
3. UPI Payments: Many of you might have seen your parents pay for things using their phones. That's UPI!
4. **Fun Fact:** UPI processed over 7 billion transactions in October 2022. That's almost as many people as there are in the whole world!
5. Online Classes: During the COVID-19 pandemic, many of you attended school online. That's the Digital Revolution in action! **Fun Fact:** During the pandemic, DIKSHA, a government learning app, was used by over 100 million students across India!
6. Indian Apps: We have our own apps like BHIM for payments and Aarogya Setu for health.
7. **Fun Fact:** The Aarogya Setu app became the world's fastest app to reach 50 million downloads, in just 13 days!

## 1.4 Fourth Industrial Revolution

Now, we're entering an even more exciting time - the Fourth Industrial Revolution!

- When it started: Around 2010 and is still happening
- What's changing: The lines between the physical, digital, and biological worlds are blurring

Key Features:

1. Artificial Intelligence (AI): Machines that can think and learn
2. Internet of Things (IoT): Everyday objects connected to the internet
3. Big Data: Using huge amounts of information to make smart decisions
4. Advanced Robotics: Robots that can do complex tasks
5. 3D Printing: Making real objects from digital designs

**Fun Fact:** India is working on its own AI system called AIRAVAT. It might one day help solve big problems like predicting monsoons or managing traffic in cities!

How it's changing India:

- Smart Cities: Cities using technology to improve life for citizens
- Digital India: Government initiative to connect all villages to the internet
- Startup boom: Many new companies using advanced technologies

## 1.5 Categories of Technology

Just like we group animals into different types (like mammals, birds, fish), we can group technology too. Here are some important categories:

---

### 1.5.1 Computers and Tablets

These are devices with screens where you can do many different tasks. Indian Example: Tablets used in some schools for digital learning.

### 1.5.2 Smartphones

These are like mini-computers that fit in your pocket and can make calls. Indian Example: Jio Phone, an affordable smartphone that helped many Indians access the internet.

### 1.5.3 Internet and Networks

These connect devices and allow them to share information. Indian Example: BharatNet project, which aims to connect all of India's villages with high-speed internet.

### 1.5.4 Software and Apps

These are programs that run on devices to perform specific tasks. Indian Example: Aarogya Setu app for health tracking during the COVID-19 pandemic.

### 1.5.5 Artificial Intelligence

This is technology that can learn and make decisions like humans. Indian Example: AIRAWAT, India's national AI program

Robotics: These are machines that can move and perform tasks. Indian Example: Robots used in some Indian car factories to assemble vehicles.

Green Technology: This is technology designed to protect the environment. Indian Example: Solar panels used in many Indian homes and businesses.

### 1.5.6 Virtual Reality (VR)

These create digital worlds or add digital elements to the real world. Indian Example: Virtual labs used in some Indian schools for science experiments.

### 1.5.7 3D Printers

This technology creates physical objects from digital designs. Indian Example: 3D-printed prosthetic limbs being developed by some Indian startups.

### 1.5.8 Internet of Things (IoT)

The Internet of Things (IoT) is when everyday objects, like fridges or thermostats, can connect to the internet and talk to each other, making our homes and lives smarter and more convenient.

---

### 1.5.9 Drones

Drones are flying robots that you can control from the ground, often used to take cool pictures and videos from high up in the sky.

## 1.6 Components of Technology

Think of technology like a recipe for your favourite dish. Just like a recipe needs different ingredients, technology needs different parts to work. Let's look at these parts

### 1.6.1 Problem or Need

This is like feeling hungry - it's the reason we start cooking (or creating technology). Example: We need to talk to friends who live far away.

### 1.6.2 Solution

This is the dish we decide to make - our answer to the problem. Example: A messaging app like WhatsApp.

### 1.6.3 Knowledge and Information

This is like knowing how to cook - the facts and skills we need. Example: Understanding how internet networks work.

### 1.6.4 Tools and Techniques

These are like our cooking utensils and methods - the things we use to build our solution. Example: Computers, programming languages, and software.

### 1.6.5 Data

This is like the ingredients of our dish - the information we use to make our solution work. Example: User profiles, messages, and contact lists.

### 1.6.6 Process

This is like the steps in our recipe - the way we put everything together. Example: Designing, coding, testing, and launching the app.

### 1.6.7 Testing

This is like tasting our dish to make sure it's yummy - we try out our technology to see if it works well. Example: Having people use the app and give feedback before launching it.

---

## 1.7 Characteristics of Technology

Now, let's look at what makes technology special. These are like the qualities that make your technology awesome!

### 1.7.1 Interactive

Technology responds to what you do, like a friend you can talk to. Example: When you tap an app on your phone, it opens.

### 1.7.2 Fun

Many technologies are designed to be enjoyable and entertaining. Example: Video games and photo filters.

### 1.7.3 Smart

Some technologies can learn and make decisions. Example: A music app that suggests songs you might like.

### 1.7.4 Connected

Many devices can talk to each other and share information. Example: Your smartwatch can show messages from your phone.

### 1.7.5 Portable

Lots of technology can be carried around easily. Example: Smartphones and tablets

### 1.7.6 Educational

Technology can help us learn new things. Example: Educational apps and online courses.

### 1.7.7 Creative

Technology allows us to make new things. Example: Digital art programs and music production software.

### 1.7.8 Fast

Technology often works very quickly. Example: Sending an email across the world in seconds.

---

### 1.7.9 Innovative

Technology often introduces new ideas and ways of doing things. Example: Virtual reality headsets that let you explore new worlds.

We are growing up in one of the most exciting times in history! The Digital Revolution has already changed so much, and the Fourth Industrial Revolution is happening right now. You'll be part of shaping how it changes our world. By understanding these basic ideas, you're taking the first steps to becoming the inventors and innovators of tomorrow. Who knows? Maybe you'll create the next big thing that changes the world!

### 1.8 Assessment

Read the Following MCQs and Tick the Correct Answer

1. What is the Digital Revolution also known as?

- ☐ The Second Industrial Revolution
- ☐ The Fourth Industrial Revolution
- ☐ The Third Industrial Revolution
- ☐ The Information Age

2. When did the Digital Revolution begin?

- ☐ In the early 1800s
- ☐ In the late 1900s
- ☐ In the early 2000s
- ☐ In the late 1700s

3. The Fourth Industrial Revolution is primarily focused on:

- ☐ Machines
- ☐ Paper
- ☐ Data
- ☐ Factories

4. What is an example of a wearable tech device?

- ☐ Laptop
- ☐ Smartwatch
- ☐ Desktop
- ☐ Tablet

---

5. Which of the following is considered an example of a Smart Home Device?

- ☐ Alexa
- ☐ PlayStation
- ☐ Laptop
- ☐ Smartphone

6. What does IoT stand for?

- ☐ Internet of Tasks
- ☐ Internet of Technology
- ☐ Internet of Things
- ☐ Internet of Telecommunication

7. Virtual Reality (VR) is a technology that

- ☐ Allows you to print objects
- ☐ Makes you feel like you're in a different place using special goggles
- ☐ Sends messages over the internet
- ☐ Tracks your fitness levels

8. Which of the following is an example of educational technology?

- ☐ Fitness tracker
- ☐ Online classes
- ☐ Video game console
- ☐ Drone

9. In technology development, identifying the solution means

- ☐ Looking for new problems to solve
- ☐ Collecting information and data
- ☐ Coming up with creative ways to solve the problem
- ☐ Testing different processes

10. What characteristics of technology help in learning new things in a fun way?

- ☐ Technology is fast
- ☐ Technology brings creativity
- ☐ Technology makes you a better learner
- ☐ Technology is versatile
