7.4 Online Games — Risks and Dangers- - - - -	126
7.5 Safety Measures While Playing Games- - - - -	127
7.6 Limit Friendship Online - - - - -	128

Chapter 1: Google sheets

One day, Aarav and Maya were sitting in their classroom when their teacher, Ms. Priya, asked a question.

Ms. Priya: “Do you know how we find information on the internet?”

Aarav excitedly raised his hand. “We search on Google!”

Ms. Priya smiled. “Yes! Google is a big company that helps us find information quickly. But did you know that Google also has many other useful tools?”

Maya was curious. “Like what, ma’am?”

Ms. Priya said "Google has many amazing products! We use Google Search to find answers, Gmail to send emails, Google Maps to find places, and even YouTube to watch videos. But today, I will introduce you to a special tool – Google Sheets!"

Ms. Priya: "Students, have you ever helped your parents make a shopping list or keep track of your monthly expenses?"

Maya: "Yes ma'am! My mother writes everything in a notebook, but sometimes the pages get torn or lost."

Aarav: "My father uses his phone calculator, but he says it's hard to remember all the numbers."

Ms. Priya: "Today, I'll teach you about a magical tool that can solve both these problems - Google Sheets! It's like having a super-smart notebook that never gets lost and can do math for you."

1.1 What are Google Sheets?

Aarav and Maya listened carefully as Ms. Priya continued.

"Google Sheets is like a practical notebook where we can write numbers, make tables, do calculations, and organize information. It's just like Microsoft Excel, but even better because we can use it on any device and share it with friends!"

Maya's eyes lit up. “That sounds fun! But what can we do with it?”

Ms. Priya explained:

- We can use it to track pocket money.
- We can make lists, like our daily timetable.
- We can add numbers and use formulas to find totals, averages, and more.
- We can even create colorful charts to understand our data better!

Aarav asked, "Can we use it with our friends?"

"Yes!" said Ms. Priya. "Google Sheets allows many people to work together at the same time. So if you are doing a school project, all your friends can edit the same sheet from their own computers!"

1.2 Google Sheets vs. Microsoft Excel

Ms. Priya wanted to make things simple and clear, so she wrote a comparison on the board:

Feature	Google Sheets	Microsoft Excel
Access	Works online using a web browser.	Works offline as a software/app.
Collaboration	Easy to share and edit with others.	Sharing is possible but not as easy.
Cost	Free with a Google account.	Paid (part of Microsoft Office).
Saving	Saves automatically in Google Drive.	You need to save manually.
Features	Great for teamwork and basic tasks.	Better for advanced features and big data.
Internet	Needs the internet to work fully.	Works offline without the internet.

Maya looked at the board and smiled. "So, Google Sheets is perfect for group projects!"

Ms. Priya nodded. "You are right Maya! Now let's begin learning Google Sheets"

1.3 Logo of Google Sheets

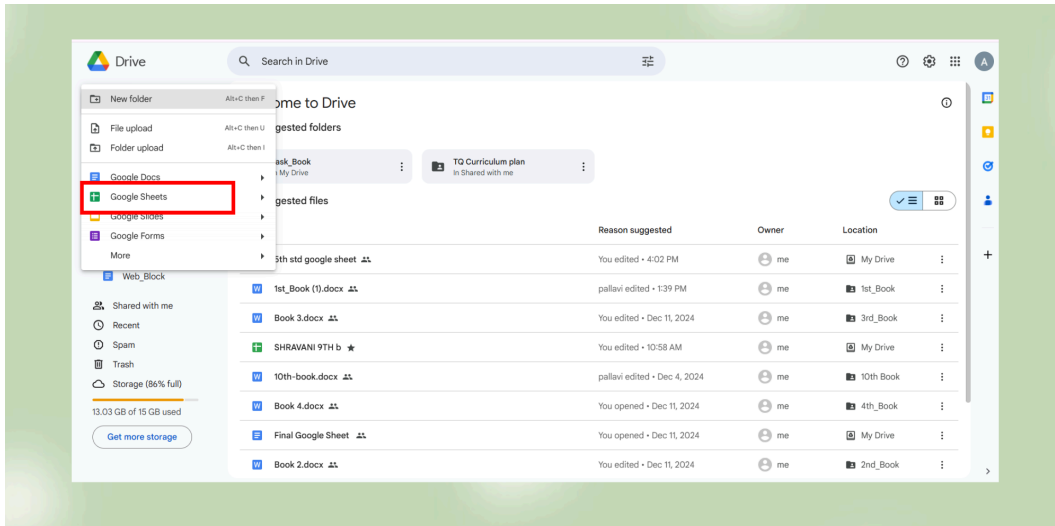

Ms. Priya introduced a bright green colour block with white window. She said this is the logo of google sheets

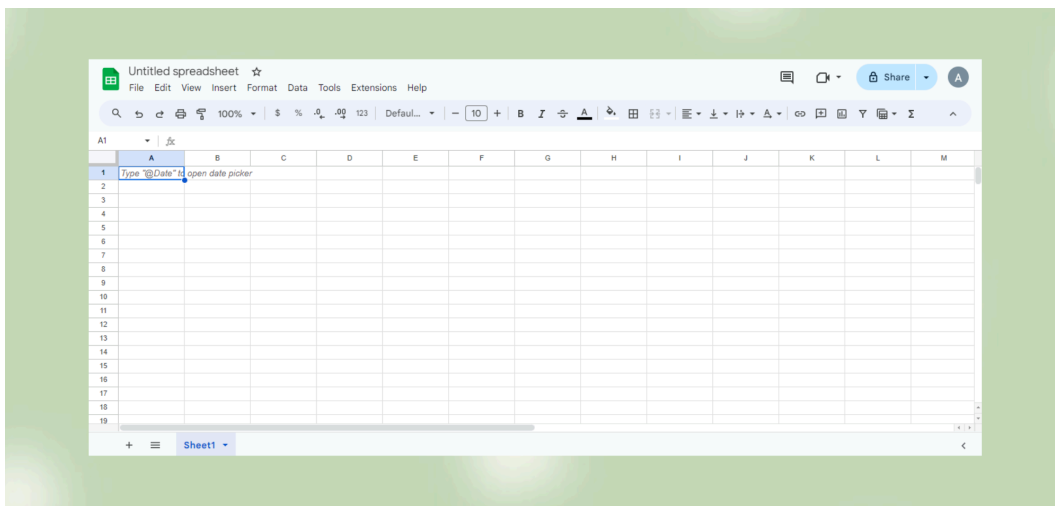

1.4 Lets open our first Google Sheets

Ms. Priya guided the class step by step:

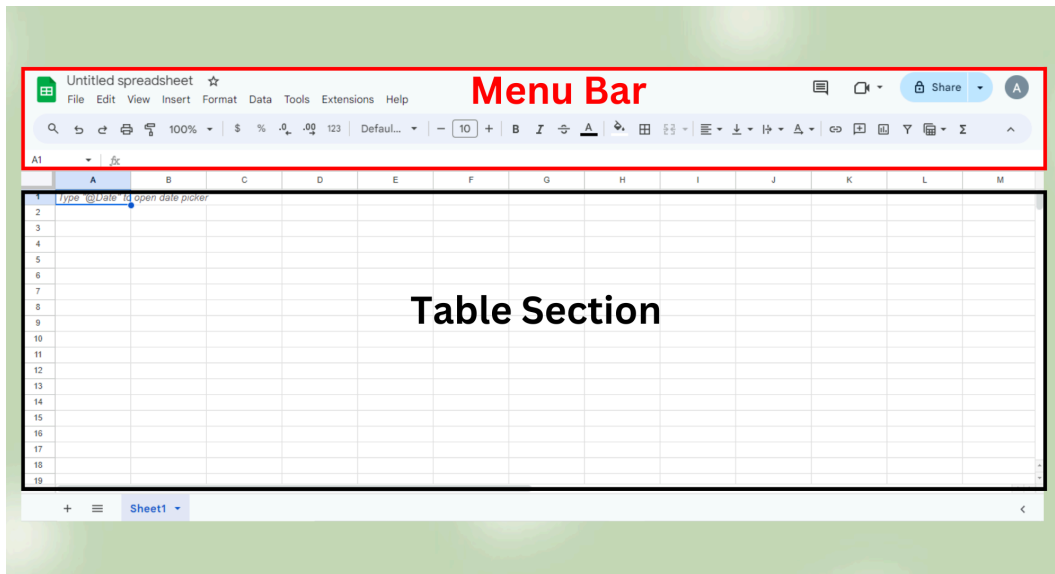

1. Go to Google Drive.
2. Click on the "+" (New) button.
3. Select Google Sheets.

Here is interface of Google sheet

Ms. Priya pointed to the screen and said:

❖ **Menu Bar:**

- Found at the top of the screen.
- It has options like **File, Edit, View, and Insert** to help you work with your sheet.

❖ **Table Section:**

- This is the main area where you work.
- It has boxes called **cells** made by rows (numbers) and columns (letters).
- You can enter and organize your data here.

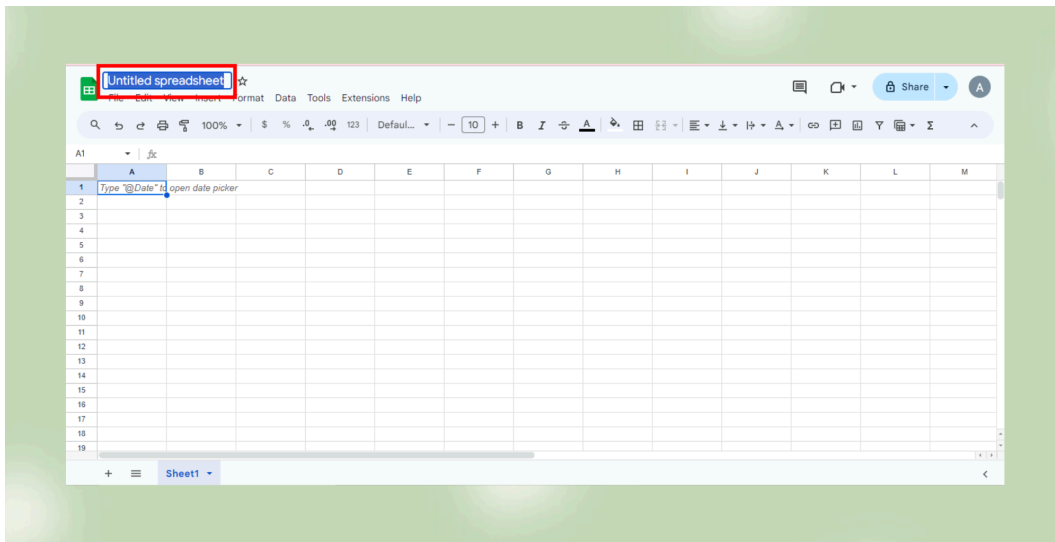

First, we will begin with the table section and cover the menu-bar options by creating different types of data frames."

She then pointed to the top of the screen:

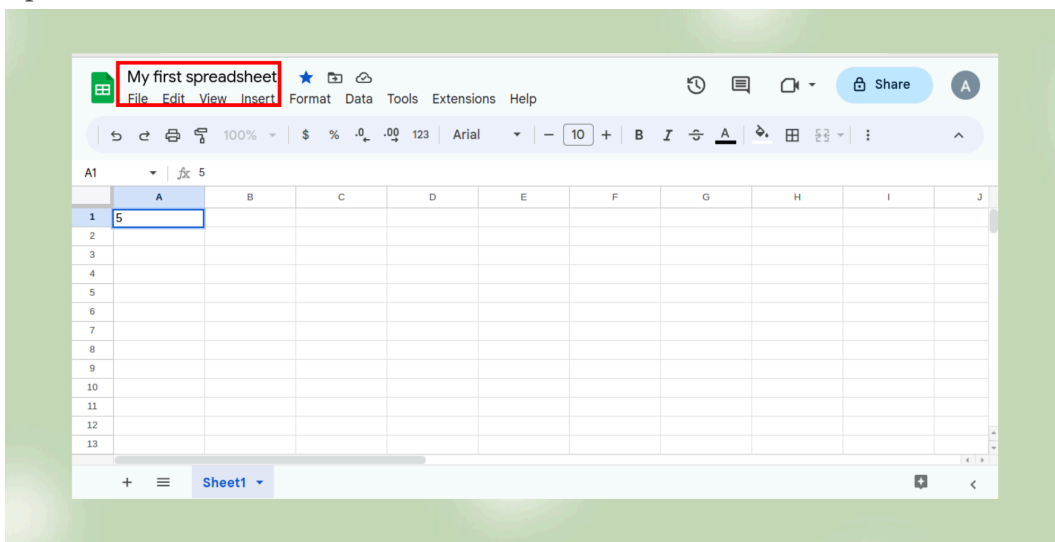

"Now, look at the title of your spreadsheet. It says 'Untitled spreadsheet.' Let's give it a name.

Let's create and add information to our First Spreadsheet!

Click on the title at the top and type in a name for your spreadsheet.

My First Spreadsheet.

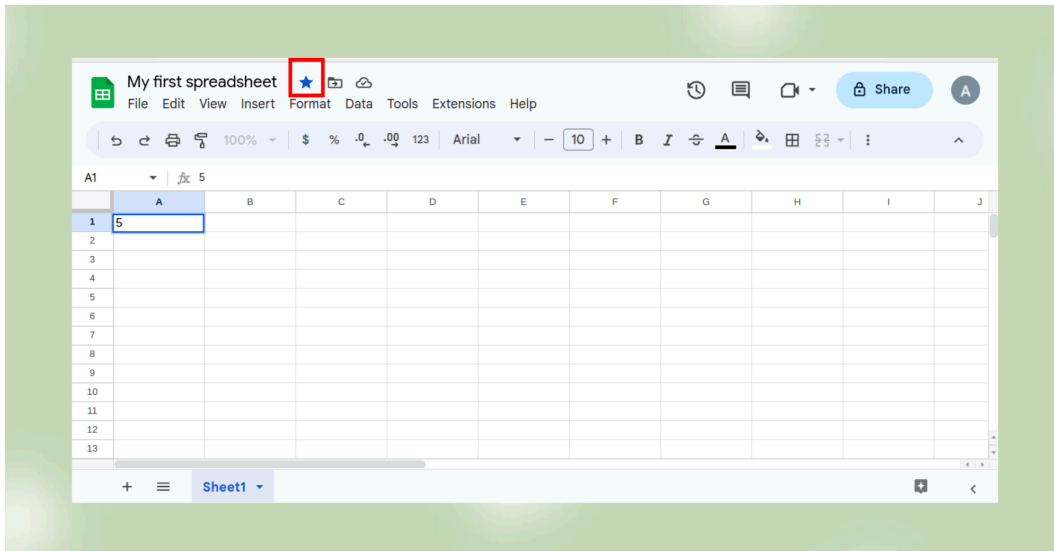

Ms. Priya continued, "Many times, we have important files that we want to find quickly. Instead of searching for them every time, we can mark them with a star!"

- ◆ Look for the **star icon** ★ at the top right.
- ◆ Click the **star** to mark the file as important

1.5 Task

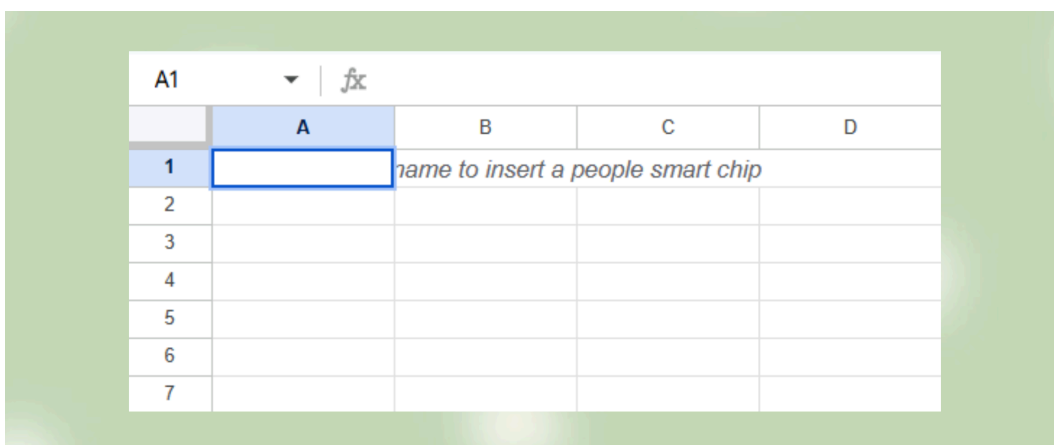

Then, go to Google Drive and view the file in the Starred section.
Share your file with your friend and teacher.

1.6 Introduction to table section

Ms. Priya smiled and said, "Now that we have opened Google Sheets, let's take a closer look at the table section!"

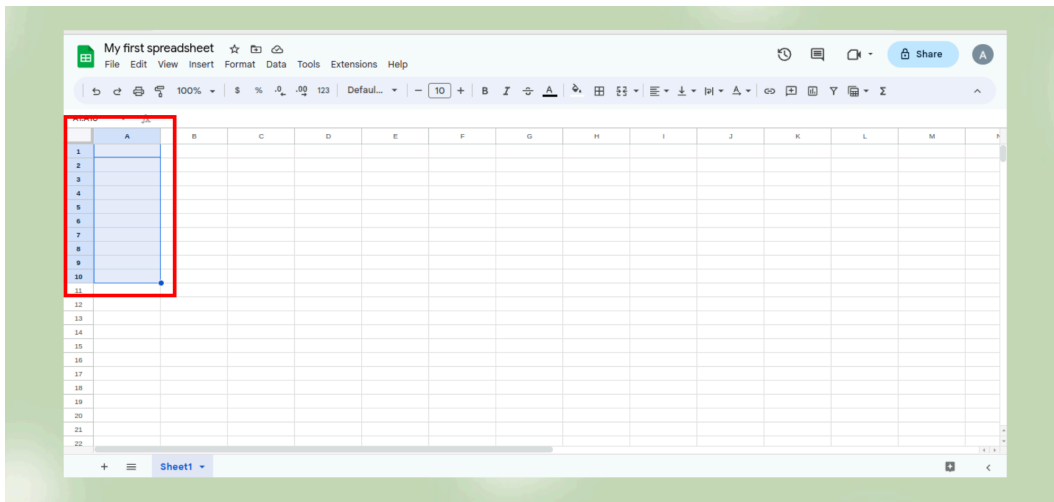

She pointed to the screen and explained:

♦ **Cells** – Think of a cell like a small box in a notebook where you write something. Each cell can hold text, numbers, special characters, symbols or formulas!

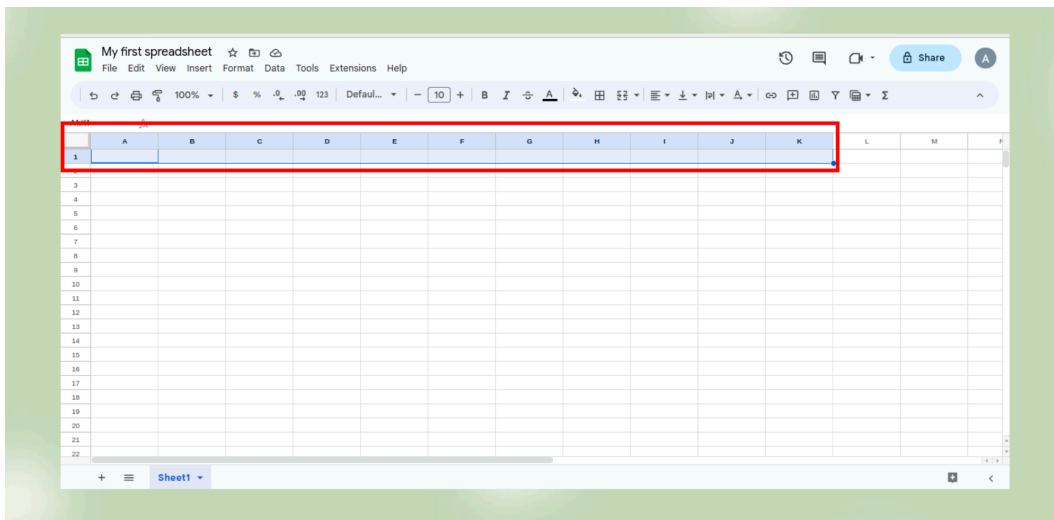

Column: A column is a vertical block of cells. It goes from **top to bottom** and is labeled with letters (A, B, C...).

Row: A row is a horizontal block of cells. It goes from **left to right** and is labeled with numbers (1, 2, 3...).

1.7 Task :Now let us try to help Siya to create her Daily

Timetable and see what rows and columns do.

Siya's mother has asked her to create her daily time table. But to create her time table she has to follow some instructions given by her mother. The instructions given to her are:

1. Set aside 8 hours for sleep.
2. Dedicate 6 hours for school

3. Dedicate 1.5 hours for self study and homework.

Use the remaining time for:

4. Meals (breakfast, lunch, dinner)
5. Play or hobbies (sports, games, reading, etc.)
6. Personal care (getting ready, hygiene)
7. Any other activities you enjoy or need to do.

Can we help Siya create her timetable? Create a timetable in your notebook and make sure to include all activities.+

Now that we have created a successful timetable for Siya

1.8 Time Table

Ms. Priya said, "Let's create our school **timetable**! We have our school-time table in our calendars. Let's create it on the spreadsheet.

C11	A	B	C	D	E	F	G
1	Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
2	7:15-8:00	Assembly	Assembly	Assembly	Assembly	Assembly	Yoga/Art
3	8:00-8:45	Math	English	Science	Math	English	Science
4	8:45-9:30	Science	Math	Social Study	English	Math	Social Study
5	9:30-10:15	English	Science	Math	Social Study	Science	Math
6	10:15-10:30	Break	Break	Break	Break	Break	Break
7	10:30-11:15	Social Study	Science	English	Science	Social Study	English
8	11:15-12:00	PE	Art	PE	Art	PE	
9	12:00-12:30	Computer	PE	Computer	PE	Computer	

Step 1: First, we need to provide a title!

- Insert a row above the table.

1	A	B	C	D	E	F	G
2	Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
3	7:15-8:00	Assembly	Assembly	Assembly	Assembly	Assembly	Yoga/Art
4	8:00-8:45	Math	English	Science	Math	English	Science
5	8:45-9:30	Science	Math	Social Study	English	Math	Social Study
6	9:30-10:15	English	Science	Math	Social Study	Science	Math
7	10:15-10:30	Break	Break	Break	Break	Break	Break
8	10:30-11:15	Social Study	Science	English	Science	Social Study	English
9	11:15-12:00	PE	Art	PE	Art	PE	-----
10	12:00-12:30	Computer	PE	Computer	PE	Computer	-----
11							
12							
13							
14							

Step-2: Make the title stand out. Click on Merge Cells to combine them into one.

1	A	B	C	D	E	F	G
2	Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
3	7:15-8:00	Assembly	Assembly	Assembly	Assembly	Assembly	Yoga/Art
4	8:00-8:45	Math	English	Science	Math	English	Science
5	8:45-9:30	Science	Math	Social Study	English	Math	Social Study
6	9:30-10:15	English	Science	Math	Social Study	Science	Math
7	10:15-10:30	Break	Break	Break	Break	Break	Break
8	10:30-11:15	Social Study	Science	English	Science	Social Study	English
9	11:15-12:00	PE	Art	PE	Art	PE	-----
10	12:00-12:30	Computer	PE	Computer	PE	Computer	-----
11							
12							
13							
14							

Step-3: Write a time table.

The screenshot shows a Google Sheets spreadsheet titled "TimeTable 2024-25". The spreadsheet has columns for days of the week (Monday to Saturday) and rows for time slots. The data is as follows:

Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
7:15-8:00	Assembly	Assembly	Assembly	Assembly	Assembly	Yoga/Art
8:00-8:45	Math	English	Science	Math	English	Science
8:45-9:30	Science	Math	Social Study	English	Math	Social Study
9:30-10:15	English	Science	Math	Social Study	Science	Math
10:15-10:30	Break	Break	Break	Break	Break	Break
10:30-11:15	Social Study	Science	English	Science	Social Study	English
11:15-12:00	PE	Art	PE	Art	PE	-----
12:00-12:30	Computer	PE	Computer	PE	Computer	-----

Once the timetable was ready, Ms. Priya smiled and said, "Now, let's make it look even better!"

1.9 Task:

- **Add Borders** to make the timetable look neat.
- **Change Color** to highlight the header row.
- **Align Text** to keep it well-organized.
- **Make Text Bold** for headings to stand out.

I have added an example below, pick your favorite colour and design your school timetable

TimeTable 2024-25						
Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
7:15-8:00	Assembly	Assembly	Assembly	Assembly	Assembly	Yoga/Art
8:00-8:45	Math	English	Science	Math	English	Science
8:45-9:30	Science	Math	Social Study	English	Math	Social Study
9:30-10:15	English	Science	Math	Social Study	Science	Math
10:15-10:30	Break	Break	Break	Break	Break	Break
10:30-11:15	Social Study	Science	English	Science	Social Study	English
11:15-12:00	PE	Art	PE	Art	PE	-----
12:00-12:30	Computer	PE	Computer	PE	Computer	-----

1.10 Filter

Ms. Priya asked the students a question: what if I only wanted information on the days I have Maths period after recess?

She clicked on a **Filter Button** (▼) and said:

"Filters help us see only the information we need while hiding the rest!"

♦ **Example:** "Let's say we have a weekly schedule and want to see only 'Math' periods. We can use filters to display just that!"

Example:

Step-1: Go to the filter option.

The screenshot shows a Google Sheets interface with a spreadsheet titled "TimeTable 2024-25". The spreadsheet has columns for Time, Monday, Tuesday, Wednesday, Thursday, Friday, and Saturday. The filter icon (a small downward arrow) is highlighted on the Saturday header cell.

	A	B	C	D	E	F	G
1	TimeTable 2024-25						
2	Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
3	7:15-8:00	Assembly	Assembly	Assembly	Assembly	Assembly	Yoga/Art
4	8:00-8:45	Math	English	Science	Math	English	Science
5	8:45-9:30	Science	Math	Social Study	English	Math	Social Study
6	9:30-10:15	English	Science	Math	Social Study	Science	Math
7	10:15-10:30	Break	Break	Break	Break	Break	Break
8	10:30-11:15	Social Study	Science	English	Science	Social Study	English
9	11:15-12:00	PE	Art	PE	Art	PE	-----
10	12:00-12:30	Computer	PE	Computer	PE	Computer	-----

Step-2: Filter Icons Appear on All Headers

- Small filter icons (▼) will now be visible on all column headers, from Monday to Saturday.

Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
7:15-8:00	Assembly	Assembly	Assembly	Assembly	Assembly	Yoga/Art
8:00-8:45	Math	English	Science	Math	English	Science
8:45-9:30	Science	Math	SocialStudy	English	Math	SocialStudy
9:30-10:15	English	Science	Math	SocialStudy	Science	Math
10:15-10:30	Break	Break	Break	Break	Break	Break
10:30-11:15	SocialStudy	Science	English	Science	SocialStudy	English
11:15-12:00	PE	Art	PE	Art	PE	
12:00-12:30	Computer	PE	Computer	PE	Computer	

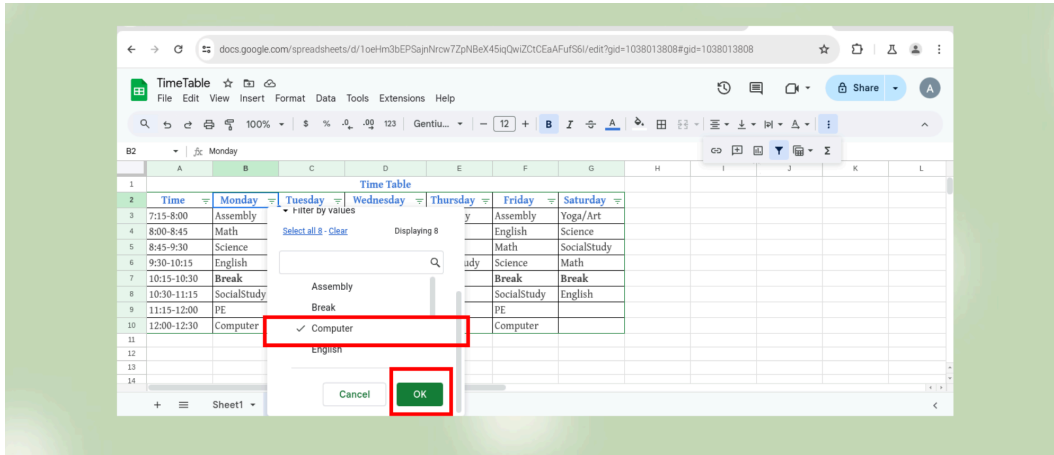

Step-3: Multiple Filtering Options Available

- Click on any filter icon (▼) to see different options:
 - Filter by values → Select specific subjects or times.

Time	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
7:15-8:00	Assembly				Assembly	Yoga/Art
8:00-8:45	Math				English	Science
8:45-9:30	Science				Math	SocialStudy
9:30-10:15	English				Science	Math
10:15-10:30	Break				Break	Break
10:30-11:15	SocialStudy				SocialStudy	English
11:15-12:00	PE				PE	
12:00-12:30	Computer				Computer	

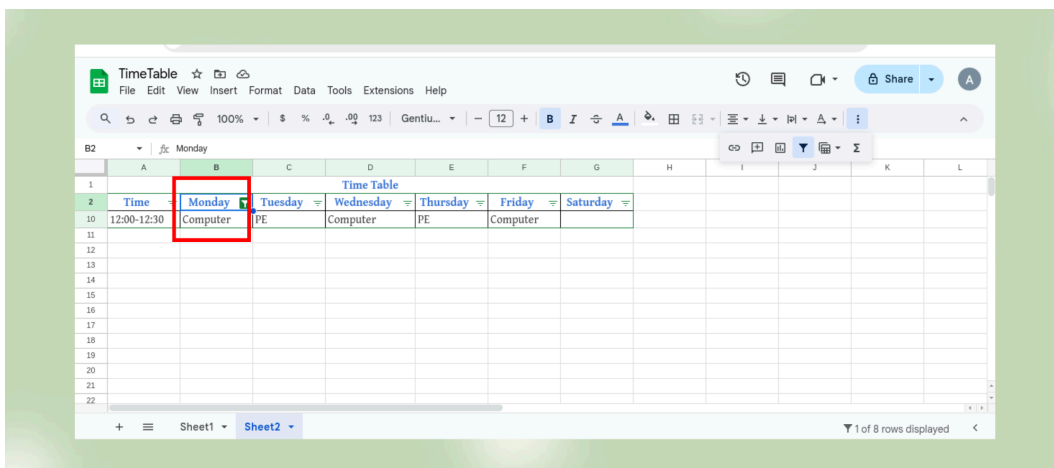

Step-4: Apply Filter on Monday's Data

- Click the filter icon on the Monday column.
- Select "Filter by values" and choose only "Computer".

Step-5: View the Filtered Output

- Now, only the rows containing "Computer" under Monday will be displayed, and the rest will be hidden.

Key Features of Filter:

- ✓ Show only specific rows based on conditions (e.g., show only "Computer" classes).
- ✓ Hide unnecessary data without deleting it.
- ✓ Make it easier to analyze large datasets.
- ✓ Sort data in ascending or descending order.

1.11 Task : Filtering Your Timetable

- ✓ Show only **Tuesday**'s schedule.
- ✓ Display only the "**Math**" periods.
- ✓ Find all **break times** quickly.

1.12 Working with Sheets: A Fun Way to Manage Money!

Sam's father decided to give Sam ₹100 as his weekly pocket money. "You can spend it as you like, but remember to manage it wisely and inform me on Saturday morning how much you have saved by the end of the week!" his father said.

Rohan was excited! But soon, he realized that he had to tell his father about his savings too and that if he spent all his money in one day, he wouldn't have anything left for the rest of the week.

He thought to himself, "Why don't I try to use Google sheets to track my daily spending? "I need to plan my spending and savings properly!" he thought. I can ask Ms. Priya to check if I am on the right track.

So, he decided to track his expenses using Google sheets.

	A	B	C	D	E	F
1	Day	Distributed 100 (₹)	Money Spent (₹)	Money Saved (₹)	Expense Category	
2	Sunday	15				
3	Monday	15				
4	Tuesday	15				
5	Wednesday	15				
6	Thursday	15				
7	Friday	15				
8	Saturday	10				
9	Total	100	0	0		
10						
11						

1.13 Task:

Sam created

Now, complete the table by adding data for each day:

- 1 Enter the amount you spent each day in the "Money Spent (₹)" column.
- 2 Calculate how much you saved each day by subtracting spent money from distributed money and write it in the "Money Saved (₹)" column.
- 3 Add an "Expense Category" column to track where you spent the money (e.g., Snacks, Stationery, Travel, Entertainment, etc.).

Example: If you spent ₹10 on snacks on Monday, enter:

- Money Spent (₹): 10
- Money Saved (₹): 5 (since $15 - 10 = 5$)
- Expense Category: Snacks

1.14 Basic formula

One afternoon, **Riya, and Aarav** were working on their school stationery list in **Google Sheets**. They had written down all the items, their quantities, and prices, but something was missing.

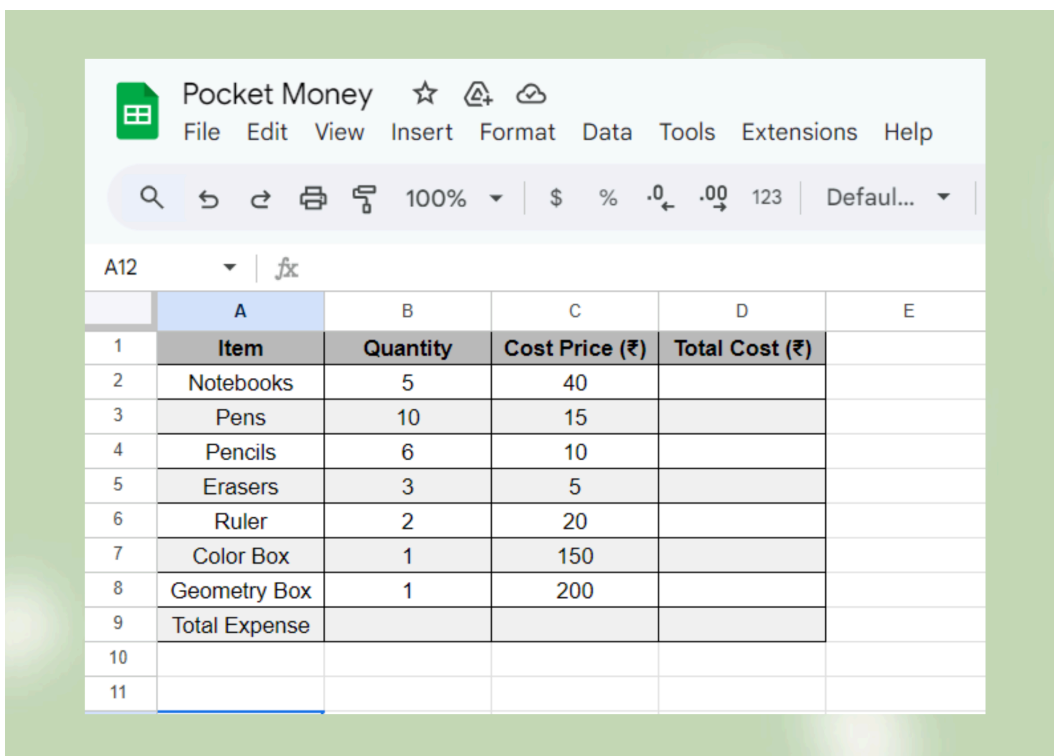

Aarav: "We have listed everything, but how do we find the total quantity and total cost?"

Riya: "If we add everything manually, it will take a long time. What if we make a mistake?"

Just then, **Ms. Priya** walked by and noticed their confusion.

Ms. Priya: "You can use **formulas** to calculate totals quickly! Let me show you two easy ways to do it."

We learn basic formula using this data

The screenshot shows a Google Sheets interface with a spreadsheet titled "Pocket Money". The spreadsheet has columns for Item, Quantity, Cost Price (₹), and Total Cost (₹). The data is as follows:

	A	B	C	D	E
1	Item	Quantity	Cost Price (₹)	Total Cost (₹)	
2	Notebooks	5	40		
3	Pens	10	15		
4	Pencils	6	10		
5	Erasers	3	5		
6	Ruler	2	20		
7	Color Box	1	150		
8	Geometry Box	1	200		
9	Total Expense				
10					
11					

Here are **two main ways** to apply formulas:

Method 1: **Ms. Priya:** "Let's start by finding the total quantity of stationery items."

Steps:

1. Click on the cell where you want the result.

2. Type "=" and then write the formula.
3. Press Enter, and the result will appear.

Example: To calculate total Quantity of stationary product

- Click on the cell where you want the total (e.g., B9).
- Type =SUM(B2:B8).
- Press **Enter**, and it will calculate the total.

	A	B	C	D	E
1	Item	Quantity	Cost Price (₹)	Total Cost (₹)	
2	Notebooks	5	40		
3	Pens	10	15		
4	Pencils	6	10		
5	Erasers	3	5		
6	Ruler	2	20		
7	Color Box	1	150		
8	Geometry Box	1	200		
9	Total	=SUM(B2:B8)			
10					
11					
12					

Aarav: "Wow! No need to add everything manually!"

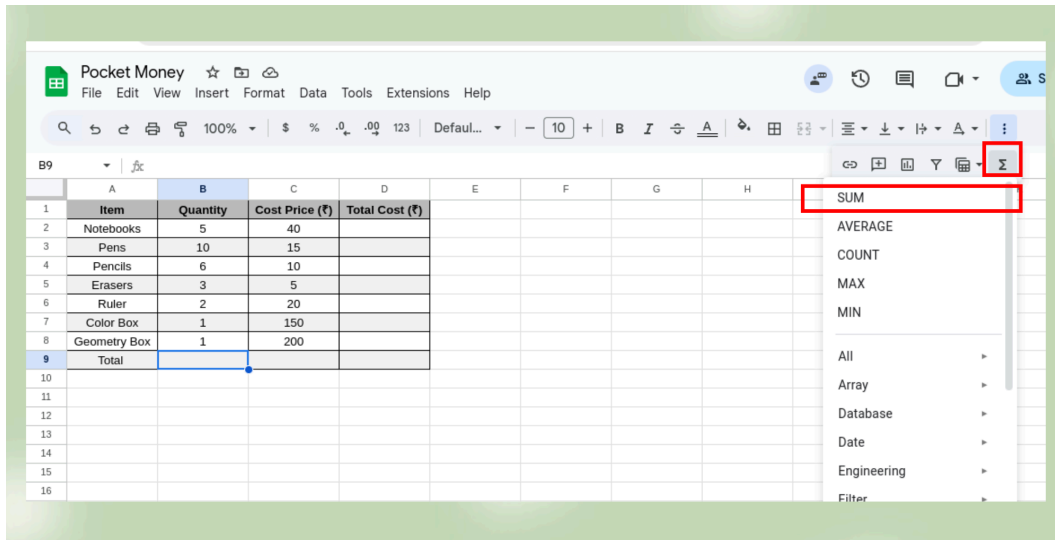

B9 fx =SUM(B2:B8)					
	A	B	C	D	E
1	Item	Quantity	Cost Price (₹)	Total Cost (₹)	
2	Notebooks	5	40		
3	Pens	10	15		
4	Pencils	6	10		
5	Erasers	3	5		
6	Ruler	2	20		
7	Color Box	1	150		
8	Geometry Box	1	200		
9	Total	28			
10					
11					

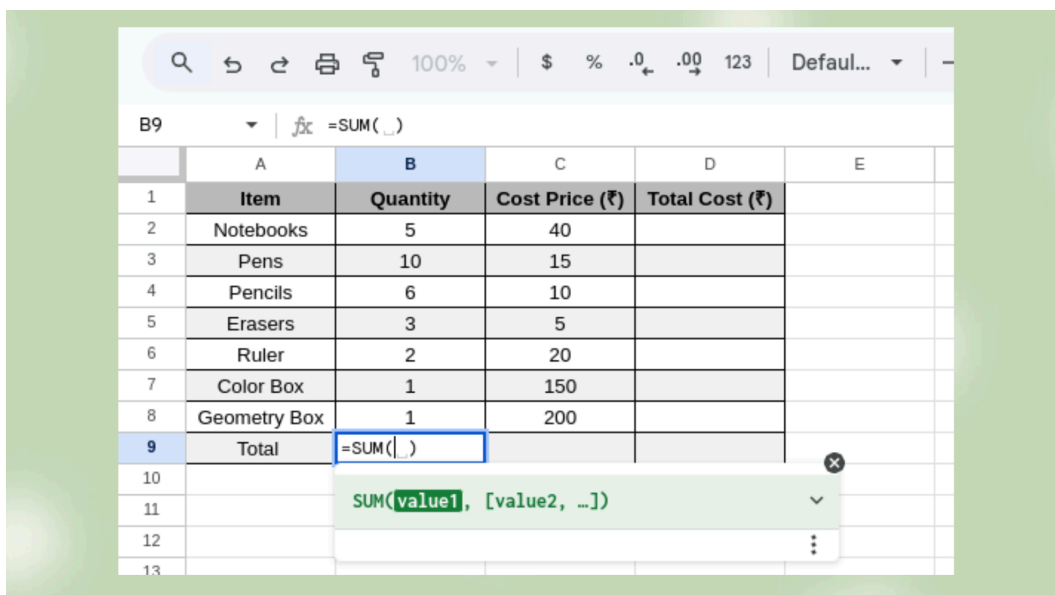

Method-2 **Ms. Meera:** "Now, let me show you another way using the formula bar

Steps:

Click on a cell where you want to apply a formula. Look at the formula bar at the top of Google Sheets.

Type the Formula

Press Enter to get the result.

	A	B	C	D	E
1	Item	Quantity	Cost Price (₹)	Total Cost (₹)	
2	Notebooks	5	40		
3	Pens	10	15		
4	Pencils	6	10		
5	Erasers	3	5		
6	Ruler	2	20		
7	Color Box	1	150		
8	Geometry Box	1	200		
9	Total	=SUM(B2:B8)			
10					
11					

Now we will find total cost

Click on the cell where you want the result. Type "=" and then write the formula.

	A	B	C	D
1	Item	Quantity	Cost Price (₹)	Total Cost (₹)
2	Notebooks	5	40	=B2*C2
3	Pens	10	15	
4	Pencils	6	10	
5	Erasers	3	5	
6	Ruler	2	20	
7	Color Box	1	150	
8	Geometry Box	1	200	
9	Total	28		
10				
11				

Aarav: "But what about individual total costs? We need to multiply the quantity by the price!" **Ms. Meera:** "You can do that easily with a formula, then use **Auto-Fill!**"

Press Enter to get the result. After pressing Enter, you will see an Auto-Fill option. By using the Auto-Fill feature, you can quickly apply the formula to all rows and get the total prices automatically.

	A	B	C	D	E	F	G
1	Item	Quantity	Cost Price (₹)	Total Cost (₹)			
2	Notebooks	5	40	200			
3	Pens	10	15	150			
4	Pencils	6	10	60			
5	Erasers	3	5	15			
6	Ruler	2	20	40			
7	Color Box	1	150	150			
8	Geometry Box	1	200	200			
9	Total	28		0			
10							
11							
12							
13							

1.15 Task

1. Find the Most Expensive Item

- Use the MAX formula to find the highest total cost.

2. Find the Least Expensive Item

- Use the MIN formula to find the lowest total cost.

3. Calculate the Average Cost Per Item

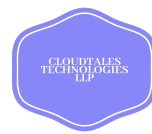

- Use the AVERAGE formula to find the average total cost.

1.16 Task: Create Your Own Budget!

Ms. Meera: "Now that you have learned formulas, let's try something fun!"

Task: Create a **monthly budget** in Google Sheets!

1. List down different expenses like food, travel, school supplies, entertainment, and savings.
2. Enter the amount you plan to spend for each category.
3. Use the SUM formula to find the total monthly budget.

4. Use Auto-Fill to calculate weekly expenses automatically.
5. Find out the highest expense using the MAX formula and the lowest expense using the MIN formula.

Ah — got it! You want the numbering like **1. 2. 3.** instead of **Q1. Q2. Q3.** — let me fix that cleanly with checkboxes:

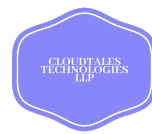

1.17 Assessment

Read the following MCQ and Tick the Correct Answer.

1. What is Google Sheets?
 - ☐ A video watching platform
 - ☐ A tool to send emails
 - ☐ An online tool to create tables, do calculations, and manage information
 - ☐ A game
2. Which of the following is the difference between Google Sheets and Microsoft Excel?
 - ☐ Google Sheets works offline, while Excel works online
 - ☐ Google Sheets requires a paid account
 - ☐ Google Sheets saves files automatically in Google Drive
 - ☐ Excel is free for everyone
3. What is the logo of Google Sheets?
 - ☐ A blue square with a play button
 - ☐ A bright green block with a white window
 - ☐ A red envelope
 - ☐ A yellow star
4. What are columns in Google Sheets labeled with?
 - ☐ Numbers
 - ☐ Letters
 - ☐ Symbols
 - ☐ Emojis

-
5. What does the 'Filter' option in Google Sheets help us to do?
- ☐ Hide the entire table
 - ☐ Show only the specific information we need
 - ☐ Add new rows
 - ☐ Change the sheet's color
6. Which formula is used to find the total of a group of numbers in Google Sheets?
- ☐ =TOTAL
 - ☐ =ADD
 - ☐ =SUM
 - ☐ =COUNT
7. Aarav wants to find the highest total cost of stationery items. Which formula should he use?
- ☐ =MIN
 - ☐ =MAX
 - ☐ =SUM
 - ☐ =AVERAGE
8. What feature allows you to automatically apply a formula to multiple rows in Google Sheets?
- ☐ Auto-Add
 - ☐ Auto-Fill
 - ☐ Auto-Save
9. In Google Sheets, which formula would you use to find the average of several values?
- ☐ =SUM
 - ☐ =MIN
 - ☐ =MAX
 - ☐ =AVERAGE

10. If Sam spends ₹10 on snacks on Monday and has ₹15 to spend, how much will he save that day?

- ☐ ₹10
- ☐ ₹15
- ☐ ₹5
- ☐ ₹0
